### COLD TEMPERATURES OBSERVED DURING INSPECTION (Fahrenheit)

-5 -1 40 35

### HOT TEMPERATURES OBSERVED DURING INSPECTION (Fahrenheit)

N/O

### INSPECTION NARRATIVE

In order to follow a successful Hazard Analysis & Critical Control Point (HACCP) plan, refuse containers outside shall be kept covered at all times. Overall, this facility is clean and well maintained. Thank you for your cooperation.

#### Raw Score versus Adjusted Score:

The adjusted score is a more accurate method to reflect the sanitary condition of your establishment by debiting multiple critical, as well as repeat violations. Scores above 35 are passing, scores between 35 and 0 are failing, and scores below 0 may cause your menu to be restricted or your facility to be closed.

	Raw	Repeat	Critical
<b>Total Violations Cited:</b>	2	0	0
<b>Total Demerit Points:</b>	3	0	0
<b>Raw Score:</b>	<b>97</b>	<b>Adjusted Score: 97</b>	

Inspector: Taylor Port
